design-thinking practice-oriented training program aimed to search and to pilot viable and people-centered solutions in the field of access to justice

## The Legal Empowerment Cycle

# Program principles

participatory surveys of legal needs are the key to find evidence-based solution

design thinking methodology provides the idea of empathy for each solution

piloting a model of the solution with the colleagues' feedback should go before piloting it in real situation

each solution should go through the process of gathering beneficiaries feedback, learning how the solution works and adapting it.

## KyivLEPP TEAMS

state agencies, local authorities, paralegals, social workers, local activists, grass-root initiatives, law students, lawyers. legal clinics, civil society organizations

### Teams' criteria

- the authority of the group members to make strategic decisions on the problem,
- institutional and intersectoral balance,
- awareness about the relevance of the addressed problem,
- and previous experience of solving it.
